

## **Atlas Die LLC Announces Closure of Richmond Facility**

Atlas Die LLC, headquartered in Elkhart, Indiana, recently announced the closure of their steel rule die facility in Richmond, Virginia. The plant will close in early August 2015.

“We are adjusting our operational footprint to best meet our customers’ needs”, said Scott Daniel, President and CEO of Atlas Die. “Over the past several years, our customer base have consolidated their operations and shifted away from the Richmond area and we are aligning our resources accordingly.”

Nine employees will be impacted by the closure and the company has offered all the opportunity to transfer to other Atlas locations. Current business manufactured in Richmond will be transitioned to the company’s Greensboro, North Carolina, and Atlanta, Georgia plants.

“Going forward, we believe this is the best option for Atlas and our customers,” remarked Daniel. “We look forward to continuing to provide the best and most complete line of cutting tools in the die industry.”
